## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hobo (6,227,860) in view of Choung (6,332,778). Hobo shows a dental implant 10 comprising an upper socket 14, a hollow expansion tube with a wall having alternating ribs 17 and open spaces, and a lower retaining nut 20. The tube is compressible along a major axis by tightening a retaining compression screw 30 through the socket, tube and nut so that the ribs expand outward upon tightening of the screw. The tube of Hobo does not have a truncated conical shape. The implant of Choung comprises a tube having a truncated conical shape to correspond to the shape of a natural tooth root (column 3, lines 51-61). It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the tube of Hobe in the shape of a truncated cone, in view of Choung, in order to provide further stability of the implant in the bone.

### ***Allowable Subject Matter***

Claims 3, 5-7, 9 and 11 are allowed.

### ***Response to Arguments***

Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.
